
Oregon Viral Hepatitis Elimination Plan: 4 Pillars of Elimination

PUBLIC HEALTH DIVISION

Oregon viral hepatitis elimination vision

The Oregon Health Authority is committed to the elimination of viral hepatitis in Oregon by:

- Promoting vaccination and harm reduction,
- Making testing and treatment widely available,
- Reducing stigma and discrimination against persons at risk, and
- Using high-quality data to inform elimination goals.

OR VH Elimination Plan 4 Pillars

1. Prevent New Infections

Objectives

- 1.1 Expand the availability of harm reduction services.
- 1.2 Increase the HAV and HBV vaccination rates.

OR VH Elimination Plan 4 Pillars

2. Improve Health Outcomes

Objectives

- 2.1 Increase screening and diagnosis of HBV and HCV.
- 2.2 Increase treatment (Cure!) and monitoring of chronic HCV.
- 2.3 Increase treatment and monitoring for chronic B.

OR VH Elimination Plan 4 Pillars

3. Eliminate health disparities and inequities

Objectives

- 3.1 Reduce stigma and discrimination in health care settings faced by people with or at risk for viral hepatitis.
- 3.2 Reduce disparities in diagnosis of viral hepatitis, knowledge of status, engagement with care and community stigma around diagnosis.

OR VH Elimination Plan 4 Pillars

4. Improve Surveillance and Data Usage

Objectives

- 4.1 Monitor control and spread of viral hepatitis.
- 4.2 Monitor racial and ethnic disparities.
- 4.3 Monitor morbidity and mortality due to viral hepatitis and track access to testing and treatment.

Strategy?

Work with all syndemic and non-traditional partners to overcome the racist, oppressive policies and institutions that lead to health and social inequities across urban, rural and frontier areas in Oregon.

Partners:

Anyone invested in stopping the spread of, and negative health outcomes associated with, viral hepatitis among people living in Oregon.
